

Martini Anglicus
Tabula OR THE
TARRY MESSENGER

For the Year of our Redemption, 1700.

and from the Creation, according to Sacred Writ, 5649

Being Bislextil, or Leap-Year.

Wherein is contained, (1) *Astronomical* and *Meteorological Observations*, (2) The State of the Year, deduced according to ART, from the Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Planets, (3) The Rising and Setting of the Sun, Moon and Stars: Together with many usefull Tables pertinent for such a Work, Accommodated to the Meridian of London, which lies in the Latitude of 51 deg. 32 min. North, but may indifferently serve (without sensible Error) for any other part of Great Britain. To which is added Monthly Observations and Astrological Predictions (or Conjectures) upon the whole Year, &c. Also an Ephemeris of the Diurnal Motions and Aspects of the Planets, &c. the like (in all particulars) not extant.

By HENRY COLEY, Teacher of the *Mathematics*, and the *Celestial Science*, in Baldwin's-Garden.

The Nine and Twentieth Impression.

Alius alio plura invenire potest, Nemo omnia.

I will behold the Heavens, even the Works of thy Fingers, the Moon and Stars which thou hast ordained;

Psal. 8. 3.

L O N D O N,

Printed by John Heptinstall, for the Company of Stationers, 1700.

To the Candid Readers.

Gentlemen!

This is the Twenty ninth Year of my Appearance in the World in this manner, to serve the Publick (as well as my self) which I find has been hitherto kindly accepted, and this encourages me still to proceed in my usual Course and Method, which I intend (God willing) to continue as long as I remain in the Land of the Living, (being at the writing hereof near Sixty Six Years of Age complete) notwithstanding the Gross Affronts, and Scurrilous Abuses that has been of late Years most plentifully bestowed upon me (amongst several others) by a Bold-Pragmatical Gentleman, that now takes upon him, to lay it over us, and would engross all the Astrological Knowledge to himself, for 'tis he that would be accounted the Great and only Ptolemy of our Age. 'Tis nothing but Pride and Envy that prompts him, and wholly without desert; for I never let him the least Prejudice (to my knowledge) in any kind; and the time has been, when I have received modesty, and modest encomiums from him (as I can still show under his own Hand) It was not then my old Friend Duncius Syderius, nor Ignorant Sott: [And his Ignorance is a sufficient excuse for his Crimes] and abundance of such kind of fool stuff, scarce to be paralleld amongst the common Scolds as Billingsgate. Now what this Bold Gaiuster would be at, I dare not presume to Predict, but I conclude 'twill not be always thus, I hope 'tis now almost at an end, and his Stock of Venom's nearly spent; nor shall I for the future regard or trouble my self to Reply to his Scornings, and Base Reflections (as I could yet do to better purpose than he is aware of) but leave him rather to be Castigated by younger Men, and I doubt not but now he has met with his match, and one that will stick close enough to him: I shall henceforth have nothing to do with him, and as little to say of him, and so for ever bid this our Great Astrological Goliath adieu in this farewell:

Envy! go Hang thy self, thy Word's no Law,
Thy Toad-like swelling looks not worth a Straw;
Thou shalt no more defame me, or deprive
Me of my Credit, which shall always thrive,
For all-Men see, 'tis Malice in thy Face,
Thus to abuse, must end with thy Disgrace.
If thou wilt wrangle I will take mine ease,
Thou art a Man, of Noise, but I, of Peace.

May no Disorder, nor unhappy Broil,
Disturb the Peace again of this our Isle;
But may we all link'd, and united be,
In the Affairs of Peace and Loyalty.

So says, Gentlemen!

your Annual Servant,

From my House in Baldwins
Court in Baldwins Gardens,
July xxth. 1699.

Henry Coley.

The Law's a thing Divine, made to Repell
The sinful Lusts of such as do Rebel
Against right Reason, Justice, Faith, their Prince,
And for the wronged Man is a Defence.

Its use is to correct, and keep in fear
Such as don't value what they do or sweat.

Dormit aliquando Lex, moritur nunquam.

James	2 1633	1685 Feb. 6.	52	11	Abdicated Decemb. 1688	

King William and Queen Mary Crown'd April 11. 1689.

Began or Proclaim'd Feb. 13. 1689.

Curse not the King, no not in thy thoughts, Ecclef. 10. 20.

*Monarchy's Heavens rule, and every thing
By Nature pays Obedience to their King
For Kings, by God's appointment are to sway
The Sword, and make Rebellious Men obey;
Those that oppose them, shew themselves to be
Traitors to Heaven, and to Majesty.*

*But Kings must die like Men: This we all know,
Death ends the Quarrel both of High and Low.*

January hath xxxi days.

Of Winds in general, and the Quarters thereof, *Ex variis.*
A certain affection of the Air is the Wind, and therefore the
Consideration of the same doth appertain to the absolute
Contemplation of the Earth; especially, seeing that its Cog-
nition is required in Hydrography, and most of all, in
the Art of Navigation, which is a part of Geography.

Now, that the Roman Account was always 10 days before the English
all this year, but now 11 days difference, &c.

Neither shall I here contradict some conceited Persons. If that the Commotion be higher it is term'd Air or Breeze but if that the Agitation be so small, that of it self it affecteth not the Sense of Touching, then it is not term'd a Wind, and the Air is never without such an Agitation of Particles, as the Ray of the Sun let into a Chamber

April hath xxx days.

by a narrow passage, therefore we add the word
Touch in the Definition, for that motion of the *Air* is only
 perceivable by the Eye. *Prop. 2.* Most Winds tend from one
 Quarter to the opposite Quarter, and force Bodies with them.
 This is perceivable both from the force of the Winds, or our
 Bodies, and also from the Vanes fix'd on the tops of the Masts.

Saints Days and Weath.	The ☉ place.	The ☿ place.	h	u	♂	♀	♂	♀	Mutual Aspects

2	4	54	11	35	*	13	8	☐		♂
3	5	55	12	40	14	△	7	3	20	The Aspects of this Month are for the most part of a Benevolent Nature, and aptly signify the Celerity and Activity of the Princes of Europe, to defend themselves upon all occasions —
4	6	56	1	40	☐	18	*			
5	7	57	2	40	♂	17		10		For we find the World is like a Lottery, when a Man may be made or undone in a moment; and now we hear Men of contrary Judgments appear very vexatious to each other, and such as, at this present enjoy the greatest Plenty, are strangely uneasy in the contriving the Preservation thereof. The Heavens still portend Peace and Tranquility in our Nation, yet this is a Month of much Action, and every Man is ready to abound in his own Sense. Nor should we forget to observe the tedious Transit of Mars in Scorpio, though at present it does not much concern us.

Astrological Conjectures or Observations.

Omnia rerum vicissitudo
&c.

Fine Words but foul Deeds

This Month affords variety of *Oppositions* amongst the *Planets*, which are usually followed with violent *Effects*. Now 'tis probable we may hear of *Clamours* and *Accusations* brought against some principal *Offenders*, and it may produce great *Divisions* amongst certain *Great Persons* in some *Countries* not far remote in *Europe*; But amongst all afflictions some at this time find that *Poverty* is none of the least, and appears to them more terrible than *Death* it self, and the *People* expect some novel thing to break out shortly, and the Month affords us plenty of *Intelligence* from all (or most) *Parts* of *Europe*.

Verbum fac sapientibus.

B 2 Angel

August hath xxxi days

that 11 degrees of the Horizon and 1 do interceed between two Quarters. The Cardinal Quarters are distant from one another 90 degrees. Some inter-place other Quarters, and reckon so. The Cause of the Wind is various, for seeing that the Wind is nothing else, but a continued Protraction of the Air, all those things which are able to effect such a Protraction, will be the Cause thereof.

September hath **xx** days

The chief and general Cause is the Sun it self, which attenuateth or maketh the Air thin, and rarifies it by its fiery Beams especially that on which he sendeth forth his perpendicular Rays, or over which he standeth, for the Air being rarified, requireth far more space; then it comes to pass, that the Air being forc'd by the Sun, is moved——

	Saints days and Weeks.	The place. September, 1700

P. 10 rif. 10 fe

New Moon the 2 day, at 1 in the Morning.

First Quarter the 9 day, at 1 in the Morning.

Full Moon the 17 day, at 7 in the Morning.

Last Quarter the 24 day, at 7 Afternoon.

Therefore when Fate's unkind, dear Friend be wife,
And bears its ills without the least surprize.

October hath xxxi days.

round from the East into the West. And a sign of it may be that in many places of the Torrid Zone, and every where in the Sea a continual Easterly Wind doth blow, viz. the Sun thrustleth forward the Air from the East towards the West, and exceedeth not the Torrid Zone; indeed, the rarified Air is thrust forward circularly

or Observations.

Visere est facile, providere difficile.
 Here's no less variety of Configurations this Month, than in some of the former, both of violent and benevolent Nature. However I have hopes that matters are now brought into some hopeful order.— Though at this time we may hear of many of the vulgar sort much afflicted with dangerous, and no less terrible Maledies.— But in the main, our Kingdom of England appears happy in general, and so in the late returns of her Ships from remote Parts of the World, which now or near this time may be expected.— And now is the time that some considerable matter of great moment is near Manifestation.— The Month brings Business enough along with it, and very notable Councils and Debates may be expected, both at home and abroad.

November 1st to 31st days:

towards all the Quarters, *North, East, South, West*; but yet is not admitted in all Quarters; but the most vehement Promotion is towards the *West*, because the Sun moveth towards that Quarter, therefore the Wind is always continually more sensible in the *Torrid Zone* towards this Quarter.

November, 1700.

Diurnal

First Quarter the 7 day, about 4 Afternoon.

Full Moon the 15 day, just about Noon.

Last Quarter the 22 day, at 11 in the Morn.

New Moon the 29 day, near Noon.

But if too prosperous, and too strong a Gale.

Should rather rustle than just fill your Sail.

Decem.

December hath xxi days.

But in our Zone for many days in the Morning, before
rising of the Sun, and after that, where for the most part
other Winds no cease. Of other quarters some are some
times more disposed than other to receive this force, there-
fore where the Protuberance becometh greater towards the North, the South
Wind is said to blow when towards the East, the Westwind bloweth, &c.

Table of Contents

Character of the Seven Planets
Return, Mercury, 3-Mars, 6-Venus, Mercury
Q Dragon's Head, 10-Dragon's Tail

Upon the Twelvth Sign, 111101
 Mars Lib. 1. cap. 4. 111101
 Heate them to fires of vellers, 111101
 Capricornus adversus Jovis, 111101
 In the Twelvth Sign, elid in his Golden 111101
 Look, he is admiring to behold the Bull 111101
 At all him self, who with a cheerful face 111101
 Calls to the Twelvth, so bid them mend their Pace 111101
 The Twelvth Sign follows, and the Lyon than 111101
 Next the Twelvth, a maid, not known by Man 111101
 And a young man, who (best time should last) 111101
 Weighs out the Day and Nights in equal Scale, 111101
 And thus his Scorpion son, who in his Traine, 111101
 Brought a bright lulent Star, at which (in vain) 111101
 The Cent^{ur} (with his firing drawn to his ear) 111101
 Aims his low shaft — the Goat doth next appear, 111101
 That's Capricornus call'd, who oft-times lowers, 111101
 To quench his Star, Aquarius powres 111101
 His Taver forth: next after him, be plac'd 111101
 Pisces, which of the Twelvth Sign are the last. 111101

GOLEY Astrological Observation 1699.

 Since Q. Mary dyed 5
 Since the Protestants invaded Eng. by
 the Protestants 4
 Since a new revolution of Chym. 4
 Since Peace with France 3

The Introduction to the following Poem.
Rouse up my Muse! thy Genius prompts me still,
 To beg *Mistress* to impart some skill,
 Such skill as may unrave *Mistress* *Crab*,
 Their *Mistress* and *Subjects* to *Differ*,
 I'll fear no Censure nor what Critics say,
 My friends to me, will *assist* be each day.
 How much I care how *long* *afflicted* be,
 If I my *Reader* Please, that shall please me.
 And such I seem to like my matter well,
 For them I wish I could much more excell.
 Since Satisfaction doth consist in this,
 Would I please those I cannot write *amiss*,
 Yet thus I know w^e are all *Dread* & alike,
 We do all Labour in the same mistake,
 Nor are the very best of Men so clear
 From every *Feeble* *Sold*, but somewhere
 Still the *Blind* *See* it will, and doth appear.
 Thus quickly we can other's Errors find,
 But will not see our own, that lie behind,
 And so we see, That *Mistress* have the knack,
 Often, to cast the *Beast* upon his Back,
 And then when this unruly *Beast*, is Thrown,
 Why may not *Hungrills* serve to keep him down?
 So have I seen an *Hart* in *Snow*,
 By frequent *Doublings* to, and fro,
 Run on until each *Trait* being Cross,
 Both Scent, and view, and all seem'd lost,
 But *W A T*, at last paid all the Cost.

Latic August in birds.

No. *Astrological Judgements and Observations on the Quarterly Ingresses of the Sun this year 1700. and 11. of the Sun in Capricorn*
December 11th at 11 h. 27. min. The Winter-Quarter Commences, in which Scheme I find *Sagittary* end upon the *Midheaven*, and about 17d. of *Pisces* Ascending, the Moon be- fluxes from the Conjunction of the *Sun*, and applies to the Conjunction of *Mercury*, and *Quartz* of *Mars*. The *Sun* is also in Conjunction with *Saturn*, and *Jove* in Conjunction of *Venus*; *Mercury* hastens to a *Quartz* of *Mars*, and many other Configurations of the Planets during this *Winter-Quarter*, which may have very significant effects.—For many and very Signal are the *Configurations* of the Planets this very Month.

COLEY'S *Astrological Observations*. 1700

March, April, as also in the subsequent Months of *January*, *February*, even to the Sun's entrance into *Aries*; Hence I may conclude that this *Quarter* will be attended with very considerable Councils and Consultations, such which perhaps were not expected, and as little desired by many persons in our Nation, but doubtless to the great Satisfaction of Loyal hearts, and to the Major part of our Kingdom. In General *Tempora Mutantur*, &c. may very well be applied at this time, for without all doubt we may upon good grounds conjecture, that the Actions and designs now on foot, both in our Nation and divers other parts of the World (depending upon very significant Influences) will be very great and Eminent, carried on with much *Color* and no less prudence by the most active and great *Supporters* of the *Monarchy*. Time will produce and manifest more in the particulars, and I *Predict*, and really wish our Nation may still flourish and appear, not only the *Admirable*, but *Formidable* to all the *Princes* and *Potentates* of Europe, and the other parts of the World in general, and these things may be more apparent towards the *Midst* or *End* of this *Quarter* than the *Beginning*; various *Intelligences* Arrives from several parts of *Europe*, of very *Notable* Projects now carried on, which may be thought by good Wits to be almost *Prodigious*. — The Diseases of this *Quarter* should be for the most part of a Cold and Moist Nature, as *Coughs*, *Hoarseness*, *Cathars*, *Apoplexies*, *Stoppage of the Stomach*, *Inflammations*, *Dysenteries*, *Scurvy*, *Aguets*, *Consumptions*, *catarrhus vesicae* — But no *Epidemical* Distemper, from which, *Libera* us *Domine*.

III. Of the Spring Quarter.

Which this Year takes beginning *March* the 9th near Noon, but by Tables reputed more Correct at 12 PM. At which time we have about 2 degrees of *Taurus* Culminating, and near 18 degrees of *Leo* Ascending. And the Moon hastning to the Conjunction of the Sun, then to the Square of *Jupiter* and Conjunction of *Venus*. In the Figure may be found the Trine of *Mars* and *Mercury*, as also the Sextile of *Jupiter* and *Mercury*, with many *Notable* Configurations in *April* and *May*, even till the Sun Enters *Cancer*, which I will not Repeat but refer the Reader to the *Ephemeris* foregoing — and describe this ensuing *Prædiction*, according to the *General* Rules of Art. — It was the Judgment of *Campden*

COLECTIVE REASONING

that the Cause and Reasoning of Movements of Earth or other
 ought to be taken from the variety of the *Planets* and *Stars*, and that the *Stars* are the Causes of the variation
 of all inferior things, either because the *Stars* move or the
 Earth or both, and the same Reason being farther, that if
 the *Stars* and *Planets* Causes did not vary, the *Effects* and
Transformations would not vary, but be always the same. These
 Effects which continue for a long time are from *Stable Causes*,
 or from *fixed* or *unalterable* of *Cause*, those which
 continue but for a short time, are from *variable Causes*, or
 from a *Succession* of *Causes* or *Cause*. The variation
 in the *Seasons* are from *motion* and *Station*, it is also from the
Earth, *Air*, *Water*, and *Fire*, *Plants*, and
Animals, *motion*, and these *Stars* that have most of most
 power to most affect inferior things, are the most variable,
 for they are the greatest *Causes* of the *World's* *Life*, *Death*,
 and not only for a more *Causes* and *Effect* of *Life*, but for
 the *General* *Life* and *Death* of *Mankind*, and may be seen in
 them the *Important* *Events*, it may now become the *Chief* *Sub-
 ject* both of the *Enquiry* and *Concernment* of *Man*.
 This being premised, I proceed to a brief *Summary* of
 Judgment on this *System* of *Causes* — which undoubtedly
 will be chiefly found in various *Consultations* of very high
 Concernments among our *Rulers* and *Governors*, and without
 doubt both this present Year, and some ensuing Years, we may
 expect many *Notable* and *Important* *Actions*, not only in *Eng-
 land*, but in most *Kingdoms* and *Countries* of *Europe*.

Now the two Superior *Planets* are in Reception, the *Affairs*,
 each Month are very considerable, but mostly benevolent, yet the
 Progress of *Affairs* in general present themselves somewhat
 strangely, and most Persons are too forward to determine
 upon the *Issue* they may be called for, and *Book* 122

We are now at Peace with all Nations, nor is there any
 danger or Probability of War, or real Hostility this Spring, and
 I hope we may yet continue so, notwithstanding all those *Re-
 ports* and *Rumors* that at, or about this time are spread abroad
 to the contrary; many *Scandalous Libels* are dispersed up and
 down secretly, which may reflect too severely upon the
 Persons and Actions of our Superiors, or Men of the first
 Magnitude, and the People in General repine and complain
 for want of *Peace*, &c. Much is said about *Religious Matters*
 and setting of *Affairs*, *Libels* would Perform and *Book* 123

COLEY: *Harmonical Observations.* 1700

Others very deserving Persons are Advanc'd
to Charters, as well as *Liberal Advancements*. We
are under the Influence of the Conjunction of Saturn and
Jupiter, which is at this time nearly 1200; and another ap-
proaching to the Sign Aries, which was in May 1702, which may
produce very Glorious Effects in England, and these Conjunctions
will continue in the *Triple Triflicity* all the Year 1802, for
they generally make Ten Conjunctions in every Triflicity, &
very Conjunctions happening in or near about 80 Years
which is very near 200 Years, and yet, about 100 Years to
come, in which time is concluded that all the World will be
turn'd upside down. But John Howell in his *Calophyl-Manual*,
says only this, upon this present year 1700, After he has re-
lated abundance of Dismal things to happen in the World in
the Year 1609; To heal up all, "A Famous person should ap-
pear towards the End thereof, a great Conqueror, whose
Name will spread all over the World; and shall then (all on
a sudden) give Peace to all Europe, a most happy time in
itself. — Then comes 1700, of which he says this Year
shall produce no great Matters, only every Nation is en-
deavouring to Secure it Self. Now says he Rome will be de-
stroyed, and the downfall of the Seat of St. Peter — The
Conversion of the Turks and Jews soon follows; Religion
truly Preached universally, over all the whole World, a Ge-
neral Peace, not more *Turks*, or *Rebellion*, for a great many
Years; every Man now Possesses his own *Vineyard*, our
Youth grow up to Men, Estates, old Men live their full
Years; England thou shalt rejoice as well as other Nations
in the many Blessings God affords you Annually, thus far

This Author and *Book* *Harmonical Observations* of 1700
These were Judgments deduced from the last Triple Con-
junction of Saturn and Jupiter in Leo in the Years 1682 and
1683, which were the forerunners of those considerable Mu-
tations and Revolutions in Europe this last 20 Years, which was
aggravated and Seconded by those dreadful Comets that ap-
peared all over Europe in 1680, and 1682; with many other
Concomitant Conjunctions: The succeeding Conjunction falls in
the Sign Aries, the reputed Sign of Englands Ascendant, and
being in an Equinoctial Sign its Effects should be the more
Famous and Remarkable, — and consequently within these
few Years we may justly expect most wonderful Transactions,
not only throughout all Europe, but many other parts of the
World.

GOLEY *Philosophical Observations* 1700
 Which is, for our Satisfaction, to be *Enriched* by
 the *Philosophical* *Observations*, pp. 100. as well as on *Trivial* *Mat-
 ters* success the *Construction* of *Superior* *Planets*. And
Large *Apertures* to *be* *made* *more* *and* *more* *our* *Quar-
 ters* *of* *Transmutations* *Alloys* *Magnets* *Crystals*
Acids, &c. The *Kinds* and *Qualities* of *Men* are *Described*, and
their *Ways*, or *Corrupted*, by the *Transmutations* of *the*
Great *Corruptions*, when as *the* *Corruptions* which *infect*
 are *Animally* *represented* with the *preceding* *Portions* of *the*
Heaven: *There* *shall* *I* *only* *touch* *upon* *by* *the* *way*, for *as*
these *very* *Seasons* are *in* *Season* for *some* *considerable*
time, which *in* *part* is *good* as a *Season* *April* *the* *But* a
whole *prolonged* *Season*, I do not *refuse* to *account* *in* *my* *op-*
Sense, or to be *Determined*, nor to *take* the *Liberty* to
fling, but *in* *my* *Judgment* join *Art* and *Season* to-
gether—and then I hope I may be so *lucky* as to *hit* in
the *White*, which was *always* *my* *endeavour*. The *Month*
of *March* is *attended* with *various* of *Configurations* of *the*
Planets, and *shows* it to be a *very* *active* *Month* in *the* *various*
Affairs of *our* *own* *Nation*, as well as *others*. *April* produces *some*
thing *very* *Remarkable* and *mostly* *pleasing*: But the *Month* of
May should be *more* *Benevolent* than *any* of the *former*, and
now *March* appear in *good* *Order*—to the *General* *Satisfaction*.

IV. Of the Summer Quarter.
 Which this Year takes its beginning *June* the 10th, about
 2 hours after Noon, in which time we have about
 2 degrees of *Cancer* upon the *Milky* *Way*, and we see the
Celestial *balance* *According* the *Moon* is in *Scorpio* to the
Sun, but *hasting* to an *opposition* of *Saturn*, and at the same time
Saturn and *Mercury* are in *Quartile* *Aspect*, but there are *se-*
veral *very* *Benevolent* *Configurations* which *follow* to the
End of the *Month* the *violent* enough in the *two* *successing*
Months *July* and *August*, as I shall consider in the *Sequel* of
 this *Discourse*. It was well express'd by that *Learned*
Raige Sir *Thomas* *Brown*, in his *Religio* *Medici*, That all
 cannot be *happy* at *once*, since the *Glorie* of *one* *State* is
pride upon the *Raise* of *another*: There is a *Revolution* and
Alteration of *their* *Greatness*, and they will play the *swing* of *the*
Wheel, not *moved* by *Intelligences*, but by the *hand* of *God*, when
 by all *Estates* will *their* *Zodiac*, or *orbital* *Points* according
 to *their* *Predetermined* *Periods*. The *face* of *things* appears not
 in *any* *splendid* *Condition* as yet, there are *many* *things* still to
 be

COLEY's Astronomical Observations 1700

which he is in great disorder, of which
 he is much less able to dispute about this time
 The new *Superior* appears to us *Arcturus* and *Jove* there-
 fore has changed his Sign and is taken into that of
Scorpio Signs *Capricorn*, *Mars* in the Sign *Serpis*, and still
 much more with the *Tiles* of the *Sun* and *Mercury*; therefore
 there are no violent Actions approaching us and *Mars* advises
 us every Revolution (and Quarterly Ingress) to have a Re-
 spect, or Regard to the Place of *Mars*; which has been in that
 the *Dread* and *Arrogance* ever since the beginning of *France*
 and will continue therein till the 9th or 10th of August
 next, about Seven Months; which is very considerable; his
 increased virility Sign, and many Actions of that kind may
 now in force amongst Mankind, but it should proceed no
 further, for the aforesaid Author says If *Mars* be well qualified
 and in good State, (as here in his own Domal Dignities) Then
 the affairs of the Kings Subject and their Armies, shall well
 succeed; and hence I may conclude, our flourishing Kingdom
 may not this Quarter be molested with War, or disturbed with
 sedition, or any thing of that kind; let us Learn to agree a-
 mongst our Selves, and live in Obedience to our Superiors—
 let the Country Men and and Honest Farmers serve God and
 follow their Employments, and quietly, enjoy the plentiful
 Fruit of their Labours and thus I proceed to the Consideration of

V. Of the Autumnal or Harvest Quarter.

Which this Year takes its beginning September the 22d. a-
 bout a Quarter after 4 In the Morning, at which time
 Degrees of *Gemini* Calcinates, and about 10 Degr. of *Virgo*
 falls. *Mars* is now in *Sagittary* in Square to *Mercury*, and the
 Moon applies to the *Tyler* of the *Sun*, cum multis aliis. The
 Actions of this Quarter begin with very fair pretences, and the
 People are now in expectation of very hopeful Proceedings for
 the General Advantage of the whole Nation, and here seems
 to be no contradiction during this Quarter in the great Affairs
 of the Publick, but very Mature Councils are continued, to the
 General Satisfaction of the Loyal Party, and all true Bred Ex-
 posers—But in the midst of our greatest hopes, we shall be
 made to Experience the Discontented Tongues or Pens of some
 ill-brained Spirits, that delight to bring themselves into Trouble,
 whereas otherwise they might Live at Peace.—Let such Per-
 sons know, that the Evil which they think to drive away by an
 ill-farmer's Revenge will Return upon them with usury.—For ge-
 nerally

COLEY'S Astronomical Observations 1700

Hardly be so happy as to see the same Success of them has been: Followed out, which would follow a strict and just: For, therefore the (supposed) Government (if possible) re-former: Every Whistle real or supposed: In short, making Radi- ally upon the Affairs of this Quarter to be a great concern- ment in Civil Affairs, and now generally all-deferring Men are encouraged, and many have Affairs deferred upon them: and not only so, but very Noble and generous Rewards, from their Rulers and Governments, for the Contributions from very provinces in General: And this is not all, for our Majesty has in the new grants of very Considerable Rewards, not only from the Eastern and Western Parts of the World:—To conclude, the Distress of the Quarter, and generally throughout the whole Year, should be very many, and those of dangerous Consequence, yet rarely that of a Pestilence:—and though we may have often very unfor- tunable Weather, yet there is no fear of a Scarcity, and yet the Price of Commodities will be too frequently advanced:—And thus I conclude the Affairs of this Year to be great and full be very conspicuous,——and probably more Painful than in some preceding Years:—But yet succeeding Years will assuredly produce such Lusty Matters, and of that Signal and eminent in most Parts of Europe, that some preceding Generations I pre- sume were not acquainted with the like, and perhaps never dreamt of, but of what Nature, its Time must make manifest: I can only hint, I dare not be positive, nor Press particular, here by to make poor Mortals Tremble.

VI. A Table shewing the Hour and Minute of the Seven Stars Coming to the South every 24th day of this Year, 1700.

Months	Days of the Months.

...that the Semi-diurnal Arch of the Pleiades is always 8:10

VIII. The Use of the aforesaid Tables Viz.

In the first Table you have the Southings of the Seven Stars for every 5th day in the Year, as is plain by bare inspection, Example 725. If they come to the South at 57 min. past 7, the 11th day at 14 min. past 7. The 11th day at 14 min. past 7 Afternoon. The Defecters A Directly understand the Time of the Rest, and Note that the Letter M signifies Morning, and the Letter A Afternoon, &c.

Now if you desire their Rulings and Settings also, as in my former Almanack was constantly let down every Year, (and one of them will serve yet many Years) that is to every 5th day in each Month of the Year. Then in the first place remember the Semi-diurnal Arch of the Pleiades before Noted, viz. 8:10 and now to know when this Constellation will Rise and set the first day of January, the Rule is to Subtract this 8:10 from the time of their Southings (7h 57) by adding 12 hours it will be, and the Remainder is the time of their Rising 11h 47 and this 11h 47 being added to the aforesaid 7h 57, the sum is 9:44 which is 4:13 in the Morning, calling away 12 and so in others. In the Second Table of the Fixed Stars in the First Column is their Names, in the Second is the time in Hours and Minutes that they South after the Pleiades, The Third Column is their Semi-diurnal Arches, or Fall continuance above the Horizon, by which is found their Rising and Setting.

[illegible]

100-443888-100

[illegible]

A ND, if you there will happen only, *happens* *happens*, and they will be born of the Mass, no *New Mass*, *Eden* in all this *Mass*, *Eden* of the *Mass* *Eden*. The *Mass* would be February the 17th about 10 of the *Mass* in the *Mass* 1871, *Eden* of *Eden*. This *Eden* should be *Eden* and *Eden* in our *Eden* and may have *Eden* upon *Eden* *Eden* *Eden* or left

The Second will be an *Irresistible* *Super Defect* upon the 22nd of the 12th show's of the Clock in the Afternoon, in all sorts of places. It will be a great Eclipse in itself but invisible to us, and cannot be seen in our *Hemisphere*. But the end of December this Year will happen a Notable Conjunction of *Saturn* and *Mars* in 28 Deg^s of *Pisces*, and its said in the *Armenian* that what *Cosmology*, *City*, *Nation*, *People*, *Profess*, or thing suffers, that has Relation to that part of the Sun, where this Conjunction is made, will be most Eminently concerned in its *Evils*, &c. And Let's it Desirable, to consider what *fiery* *disturbances* we have had, all over *Europe*, since we have been under the Dominion of this *fiery* *Trigon*, (which is yet to continue many Years) and therefore tis no Wonder to see or hear (too often) of so great Alterations in the *Kingdoms* and *Common-wealths*.
